AGM JUMP STARTER

SOSBOOST ⚡ 12 V 🔌 1200 CA

+++

Our AGM batteries, with pure lead are extremely efficient thanks to their ability to deliver energy at high amperage almost instantaneously (cranking amps is what is required to make the vehicle start).

Starting cables (double insulation) with an optimal length and extremely flexible benefit from a high conductivity as well as a perfect shape resistant to frequent handling.

The internal fuse protects the batteries against shortcircuits.

The single-piece moulded case in polyethylene of 5 mm, unbreakable (life time warranty), assures excellent resistance to shocks and everyday uses.
